

Priyam Somani

Portfolio

Introduction

About me

I'm Priyam Somani, a Marketing and Business Analytics professional pursuing my Master's at the University of Pittsburgh's Katz Graduate School of Business. I'm driven by a passion for transforming data into strategic, high-impact marketing initiatives that enhance brand visibility and deepen customer engagement. From sustainability-focused campaigns to data-informed pricing strategies, I leverage analytics to uncover insights, craft compelling narratives, and drive measurable business growth.

Personal projects

Throughout my journey as a marketing and business analytics professional, I have led and supported diverse data-driven initiatives that combine strategic insight with creative execution. At Peoples Natural Gas, I developed campaign dashboards and designed visually compelling outreach materials to support data center marketing and sustainability communications, aligning closely with infrastructure strategy and ESG objectives. During my experience with DMI Industries, I created a customer feedback platform and built Power BI dashboards to analyze user pain points, driving stronger engagement and sharper product positioning. At Jai Udit Suitings, I managed a performance-oriented website and implemented CRM-based segmentation strategies that improved customer acquisition and enhanced campaign ROI. Additionally, during the University of Pittsburgh Bridge Program, I developed corporate pitch decks and promotional assets that strengthened sponsorship outreach efforts. Collectively, these experiences demonstrate my ability to translate data into actionable strategies and transform insights into compelling, results-driven narratives—core strengths for both marketing and business analytics roles.

EDUCATION

University of Pittsburgh

2023 – 2025 (3.78/4)

Coursework covers data-driven marketing, predictive modeling, digital analytics, market research, and business insights, equipping me to tackle modern marketing challenges with an analytical mindset.

Christ (Deemed to be University)

2017 – 2020 (3.45/4)

Focused on foundational analytics, consumer behavior, data visualization (Tableau), and programming (SQL, R), building a strong base in data-driven decision-making.

PROFESSIONAL PROJECTS

Peoples Natural Gas

IS YOUR DATA CENTER CONSIDERING PITTSBURGH?

THE ADVANTAGES OF PITTSBURGH

- Abundant natural gas and industrial water supply
- Lower land costs and fastest deployment lead time in the U.S. (~36 months)
- Redevelopment-ready coal sites with existing power infrastructure

LOWER TOTAL COST OF OWNERSHIP

- Among the lowest delivered energy rates in the PJM region
- Stable pricing with long-term hydrogen blending support
- Flexible design for phased expansion and variable load profiles
- Advanced leak detection and security-first monitoring systems

DIRECT ACCESS TO

- On-site and contract-based hydrogen & RNG supply
- Major fiber backbone connections (Verizon, Comcast, Everstream)
- Climate resilience: No hurricanes, wildfires, or seismic threats

SCALE YOUR DATA CENTER WITH PEOPLES NATURAL GAS

BUILD SMARTER. BUILD IN PITTSBURGH.

POWER WITH PEOPLES GAS.

Bridge Program

ABOUT

The Super Analytics Challenge (SAC) is a prestigious case competition designed to tackle real-world social challenges through data-driven solutions. SAC brings together top students, universities, and industry experts to collaborate on pressing societal issues, promoting innovation and actionable outcomes. Participants engage in a rigorous process of data analysis, problem-solving, and presentation, all while competing for recognition and opportunities.

Why Participate?

By participating in SAC, universities provide their students with invaluable experience in tackling complex, real-world problems. The competition fosters collaboration between academia, industry, and non-profits, offering participants the chance to make a tangible impact on communities. Additionally, SAC enhances the university's brand visibility, strengthens research collaborations, and positions students for success in the data-driven job market.

Participating in SAC not only elevates your institution's reputation but also contributes directly to societal good, making it a valuable opportunity for any forward-thinking university.

WHY PARTICIPATE?

Brand Visibility

Gain recognition as a leading institution in data analytics and innovation by showcasing your university's successes through media coverage and academic publications.

Research and Collaboration

Strengthen your research initiatives by forming new partnerships with NGOs and industry leaders, opening doors to collaborative projects and funding opportunities.

Student Development

Provide your students with opportunities to work alongside industry professionals, enhancing their academic and professional trajectories.

Community Impact

Align your university's mission with meaningful, real-world change by participating in a challenge that prioritizes social responsibility and actionable solutions.

Join Us in Making a Difference!
Take the next step in advancing your university's mission and positioning your students for success in a data-driven world. Contact us today to learn more about how your university can benefit from participating in the Super Analytics Challenge.
